DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figures 9A and 9B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
3. The drawings are objected to because "IFF" shown in the block element 123 of Fig. 1 should be "IFFT" as mentioned in paragraph [03] of the specification. Further, in Fig. 3, "X(k)" should be labeled between the block elements 305 and 321 as mentioned in paragraph [59] of the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being

amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

4. Claims 2, 4 and 6-15 are objected to because of the following informalities:

In claim 2, line 5, the word "of" is misspelled.

In claim 4, line 4, "a phase-distorted" should be "the phase-distorted". Also see claims 9 and 14.

In both claim 6 (line 5) and claim 11 (line 4), "the symbol" should be "the demodulated symbol" in order to avoid the antecedent basis of "the shifted demodulated symbol" later recited in claims 7 and 12.

In claim 8, line 1, "in step" should be "step".

In claim 11, line 4, "than" should be "that".

The dependent claims 7 and 10 are objected because they depend upon the independent claim 6.

The dependent claims 12 and 15 are objected because they depend upon the independent claim 11.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 3-4, 8-9 and 13-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 3 (line 6), claim 8 (lines 3-4), and claim 13 (line 5), the term "the symbol time offset value" lacks clear antecedent basis.

The dependent claim 4 is rejected because it depends upon claim 3.

The dependent claim 9 is rejected because it depends upon claim 8.

The dependent claim 14 is rejected because it depends upon claim 13.

Allowable Subject Matter

7. Claims 1 and 5 are allowed.

8. Claims 2, 4 and 6-15 would be allowable if rewritten or amended to overcome the objection(s) set forth in this Office action.

Art Unit: 2611

9. Claims 3-4, 8-9 and 13-14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ohkubo et al., Taua et al., Lee, Seo et al., Szajnowski, Priotti, Kim, Shirakata et al., and Ido relate to timing, frequency, and symbol synchronizers used in OFDM receivers.
